Physical Adsorption of Gases by Solids - Thermodynamics of . 4 Apr 2013 . Adsorption on solid surfaces may be divided into two categories, viz. physical and chemical adsorption. Physical adsorption is non-specific and similar to condensation. The forces that attract the fluid molecules to the solid surface are weak van der Waals forces. Adsorption of gases on solids Solid/Solid Adsorption. We have found experimentally that many solids can disperse spontaneously onto supports to form a monolayer or submonolayer. This phenomenon may be attributed to the formation of strong surface bonds between the atoms, ions or molecules of these solids and the surface of the supports.
